Science And The Evolution Of Consciousness: Chakras, Ki, And Psi

Synopsis

Here, for the first time in English, Dr. Hiroshi Motoyama - a physician and acupuncturist, parapsychologist and psychic, yogi and electrical engineer - describes his newly devised techniques for providing the non-physical basis of Mind. The author's revolutionary research proves the validity of the ancient Indian teachings of Kundalini Yoga and the Chinese theory of acupuncture, while providing a systematic explanation of how such phenomena as psychic healing and clairvoyance really work, Dr. Motoyama establishes criteria for distinguishing between true pathological states of mind/body and the often similar symptoms that may result from meditation and mystical experience. He also offers a rationale for the practice of yoga aimed at cultivating the highest potentialities of human consciousness.

Customer Reviews

Dr Motoyama in his research described in this book managed to create a breath taking scientific link between human body and mind. He describes his invention, the device called the AMI Machine (short for Apparatus for Measuring the Functions Of the Meridians and Corresponding Internal Organ), that is a computerized system which can diagnose physiological imbalances within an individual in a matter of minutes. Basically, Dr Motoyama was able to identify and measure a relationship between human body represented by nervous system and physical organs and human mind and spirit, represented by different energy fields, chakras and meridians. This research scientifically proves that thought creates matter.

I love this book. I checked it out from the library and needed it for my own. To be a yogi and a scientist can sometimes be challenging, this book satisfied my left brain need for empirical evidence while allowing my right brain curiosity to learn about the world beyond our immediate perceptions.
