Today's Technician: Automotive Fuels And Emissions. Classroom And Shop Manual Set (Bk.1)

Synopsis

Theory, diagnostics, and service procedures for automotive fuel and emission systems are spotlighted in this newest Classroom and Shop Manual set to join the popular Today's Technician Series. Experienced author Barry Hollembeak enhances the reader's understanding of present-day automotive fuels and emission systems by covering the theories and procedures that underpin ASE high priority skills. The Classroom Manual builds upon facts and theories, while the Shop Manual, through performance-based objectives, helps readers acquire diagnostic and repair competency. Both manuals are tightly correlated with corresponding chapters and cross-references so that readers can make a sound connection between theoretical concepts and practical skills.

Book Information

Paperback: 408 pages

Publisher: Delmar Cengage Learning; 1 edition (December 8, 2004)

Language: English

Customer Reviews

was expecting two volumes-classroom and shop. received only classroom volume! a rip off if ever!classroom volume is ok but incomplete!

The book supplies what is required for my class. It's got the same issues as the other books in the series though; it has endless gramatical errors and some of the questions have wrong answers in the teacher's edition.

Good
